

Corcoran (Corky) Park

CLIENT: Town of Horizon City, Texas

Sites Southwest led a multi-disciplinary team to instill new life at "Corky" Park in Horizon City Texas. The Park, adjacent to the future town center, functions as the Town's central park. Critical to the community's public events, whether "Music in the Park" or the Christmas Tree lighting, the park now has a central plaza, plaza style skatepark, a multi-use paved trail, upgraded baseball and softball field, a new restroom building, multiple play structures, an embankment slide, outdoor sport courts, site furnishings, new trees, shrubs and irrigation system. Twenty-two existing mature trees were saved, providing much needed shade in this desert climate. Green Infrastructure techniques such as rain gardens, and integrated stormwater harvesting are featured throughout.
